

## Who You Are

As a busy offer owner, you're focused on scaling new products & funnels, working with affiliates, and driving media buying. Your attention is on the front end, so perhaps your email list is stagnant instead of scaling and generating revenue. Without proper optimization, you're missing out on a significant revenue stream and you're looking to hand this off to someone quickly and seamlessly.

## Partnering with Loop7 and our *Email Quick Start* program

Loop7 specializes in the wellness & weight loss niches, and is excited to fill a needed gap in the industry. *Email Quick Start* is designed for both new offer owners bringing in at least 500 new customers per month, as well as higher volume offer owners – helping you launch quickly and maximize growth without delays.

- **Expert List Management:** We create and manage your branded email list within Maropost. Our dedicated deliverability manager and team of analysts ensure strong inbox placement and optimization of a robust marketing calendar of both internal and 3rd party offers.
- **Shared IP System for Faster Launch:** We set you up inside Loop7's agency account inside of Maropost, using their shared IP system, allowing for a quick and efficient launch without the usual ramp-up struggles & hurdles. By using shared IPs, your email reputation builds faster, ensuring better inboxing from the start.
- **No Setup Fees – We Launch for Free:** Get started with zero upfront costs. Loop7 retains 20% of revenue after mailing costs are covered, aligning our success with yours.
- **Smooth Transition to Dedicated IPs:** As your program grows, you have the option to move to your own dedicated IPs and Maropost account under your own contract.

## Get Started Today!

Schedule a call with founder Michael Goff and fill out our pre-call form with more information about your brand and offer. Michael will walk through the launch steps and your questions on the call.
